Online Matrimony Website

PROJECT BRIEF

Project Title	Online Matrimony Website
Start Date	15 September 2022
End Date	06 December 2022
Project Team	Sudhir Samudrala Vinay Kumar Gadde Divya Kamepalli

1.   Purpose of this document

The project is about an online matrimonial website, which is a web service that helps users to discover suitable mates. Individuals looking for a mate may register and search for a profile that fulfills their requirements. This application allows users to search by gender, age, religion, caste, and marital status. An individual can select a profile that fulfills his or her requirements and send an email expressing interest; the email will be distributed together with the sender's details.

2.   Background

Everyone desires a wonderful, joyful, and long-lasting marriage and married life. To a considerable extent, it may depend on the characteristics of the present or future partner, both husband and wife. Marriage may function well if both spouses have nice qualities. Nowadays, choosing an ideal marriage partner is not difficult, but it is time consuming. Finding your marital spouse might be simple now thanks to the internet.

3.   Intended time scale

September 2022 – December 2022

4. Task Done

In the last week of software engineering project, we completed with the following tasks and successfully executed the website.

- To View Details of users along with photos - It involves viewing the details of the bride, bridegroom, or both along with the profile photos - Sudhir Samudrala
- To view schedule meeting details - Enhancing their experience and helping them find a match based on their preferences conveniently and scheduling the meeting with the partners - Gadde Vinay Kumar
- To develop user role-based accesses to web pages – The normal user can access and make interests and schedule a meeting and admin can view all the actions performed by the users - Divya Kamepalli
